providing, but not limited to, the following information:

### **PART I: TECHNICAL PROPOSAL**

The Proposal shall also provide any other relevant issue which the bidder would like to bring to the attention of the Commission whether or not having cost implications.

#### **Specifications**

The Proposal shall include a detailed description of the items proposed and include relevant technical literature.

#### **Commission's Inputs**

A description of the expected inputs/resources to be made available by the Commission and at what stage of the services.

#### **Personnel**

The Technical Proposal shall include:

- (a) A statement that the capacity of the Contractor, in terms of qualified manpower resources, is adequate to conduct the Work.
- (b) A statement of availability of the personnel, and the minimum period required before starting the work under the Contract;
- (c) A list of capable and experienced personnel, including their function and duration of assignment as key staff to work under this Contract (such as Project Manager or Team Leader, etc);

- (d) Curriculum vitae of the key staff proposed for this contract, including experience with standards and technical experience to perform the Work.

Please note that it is the bidder's responsibility alone to obtain **work permits or visa or similar** for the personnel proposed to implement this project. The Commission will make no effort nor accept any responsibility for obtaining work permits or visa or similar for the Contractor's personnel.

**Use of former Preparatory Commission for the CTBTO ("Commission") employees in the preparation of Quotations:**

A bidder must not, in the absence of prior written approval from the Commission, permit a person to contribute to, or participate in, any process relating to the preparation of a Quotation or the procurement process if the person:

- a. At any time during the 12 months immediately preceding the date of issue of the Solicitation was an official, agent, servant or employee of, or otherwise engaged by the Commission;

All sub-contractors shall be legally established in one of the CTBTO Member States.

**PART II: FINANCIAL PROPOSAL**

The Financial Proposal shall be prepared in **United States Dollars or Euro** and shall breakdown, separately, the costs for each task required by the Terms of Reference.

Note that clear and detailed explanations would enable us to evaluate the Proposal promptly and proceed with fewer requests for clarifications/justifications in a later stage. This is also a factor influencing the decision for Contract award.

The Financial Proposal shall be submitted as per Attachment 4 "Price Schedule Format" and shall contain, at the minimum, the following:

- (i) Firm fixed unit prices for the Services required by Terms of Reference for the total contract duration (one (1) year with a possibility of two optional extensions of one (1) year each.
- (ii) Firm fixed labor rates, with information on the category and number of staff proposed. This section must further include proposed person-hours/person-day including estimated man-power effort for each of the tasks required under the Terms of Reference. Please do note, that the firm fixed labor rates shall include costs and expenses for the full and proper performance of all obligations under the contract (including travel, allowances, management

and remuneration of the personnel, national income tax, medical, insurance and social security contribution, if applicable) for the provision of the services in accordance with the Terms of Reference.

### **Indirect Taxes**

In principle the Commission is exempt from taxes. Since the arrangement under which such exemption is respected varies from country-to-country, the selected bidder will be informed by the Commission whether tax exemption will occur at source or whether taxes paid by the selected bidder will be reimbursed by the Commission upon submission of the original supporting documentation. “**Taxes**” means all direct and indirect taxes (including value added tax, general sales tax or goods and services tax), assessments, fees, customs duties, liens and charges in as much as they are levied in conclusion or implementation of the Contract, including customs restrictions and charges of similar nature in respect of articles imported or exported for the Commission’s official use.

#### For Austrian companies

The price quoted shall be net of Taxes. All applicable Taxes payable by the selected bidder at the conclusion or implementation of the Contract in respect of the goods/services shall be quoted separately or be separately identified on the Proposal together with information on the nature of the tax and its method of calculation.

#### For European Union (EU) Companies

The price quoted shall be net of Taxes. All applicable Taxes payable by the selected bidder at the conclusion or implementation of the Contract in respect of the goods/services shall be quoted separately or separately identified on the Proposal together with information on the nature of the Tax and its method of calculation. Due to the VAT exemption applicable to the Commission, no VAT will be charged to the Commission by the EEC Suppliers under the Contract (Ref. EU VAT Council Directive 2006/112/EC, Article 151).

#### For Non-EU Companies

The price quoted shall be net of Taxes. All applicable Taxes payable by the selected bidder at the conclusion or implementation of the Contract in respect of the goods/services shall be quoted separately or be separately identified on the Proposal together with information on the nature of the tax and its method of calculation. For deliveries to Vienna, Austria, and due to the tax exemption at source applicable to the Commission, no Taxes shall be charged to the Commission under the Contract.

## **10. Completeness and Correctness of the Proposal**

The Commission reserves the right to verify all information furnished by you in the Proposal through a source of its choice. Any inaccurate information so given may lead to the rejection of the Proposal.

## **11. Validity of the Proposal**

The Proposal shall be valid for 90 (ninety) days after the deadline for its submission to the Commission, unless an extension of validity has been requested by the Commission.

**12. Correction of Errors**

The Commission will check the Proposal for any arithmetic errors. If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected.

**13. Evaluation of the Proposal**

The Commission, based on the evaluation criteria and method given in Attachment 2, will determine the Proposal that ‘most effectively satisfies the technical and operational requirements set out in the solicitation documents’ in accordance with the criteria specified in Attachment 2.

**14. Negotiations of the Proposal**

The Commission reserves the right to request clarifications on the Proposal and to enter into negotiations regarding technical or commercial aspects of the Proposal before awarding the contract under this RFP.

**15. Modification and Withdrawal of Proposal**

Bidders may modify or withdraw their Proposals after their submission, provided that written notice of the modification or withdrawal is received by the Commission by the closing date for the submission of the Proposal. The Proposal may not be modified subsequent to the closing date.

**16. The Commission’s Right to Reject the Proposal**

The Commission reserves the right to accept or reject the Proposal or to annul this procurement process at any time prior to the award of contract without having to inform the bidders of the grounds therefore, without thereby incurring any liability to the bidders.

**17. Costs of preparation and submission of the Proposal**

Bidders shall bear all the costs associated with the preparation and submission of their Proposal and the Commission will not be responsible or liable for those costs, regardless of the outcome of this RFP.

**18. Proprietary Information**

All documentation and information contained in this RFP are proprietary to the Commission and shall not be duplicated, used or disclosed -in whole or in part- for any purpose other than to evaluate them and respond to the Commission's request for Proposal or otherwise without prior written agreement of the Commission.

**EVALUATION METHOD:**

1. Technical Evaluation:

The technical evaluation process will be done in two stages:

1) Stage 1: Technical proposals will first be evaluated against the mandatory requirements outlined in section 1 above, on a PASS/FAIL basis.

Compliance with all mandatory requirements is required in order to pass stage 1 of the technical evaluation and to be further considered for stage 2 of the evaluation process;

2) Stage 2: The technical proposals that have passed stage 1 of the technical evaluation process, will be evaluated against the weighted criteria set forth in the evaluation matrix above.

In order to pass this stage, bidders must obtain points of at least 37 and in accordance with the scoring table indicated below:

**TABLE 2**

Points	Explanation - to be considered when assigneing the points
0	Unsatisfactory - Response incomplete, inadequate and/or non-responsive to the criterion. Bidder does not clearly understand the criterion.
1 - 2	Weak - Does <b>not</b> meet the minimum technical, functional, or performance related criterion.
3	Good - Meets the criterion in <i>most</i> areas but is lacking details and responsiveness in some areas of the criterion.
4	Very good - Meets the criterion to minimum acceptable levels in all areas.
5	Exxcellent - Meets the criterion to minimum acceptable levels in all areas and exceeds it in some areas.

2. Financial and commercial evaluation

Once the technical evaluation is finalized, the financial offers of the technically compliant bidders will be evaluated in accordance with the formula given below:

$$X = \text{Max Available Points} * Y/Z$$

Legend:

X= points to be assigned to the offer being evaluated

Y= price of the lowest priced, technically compliant offer

Z= price of the offer being evaluated

The Contract will be awarded to the bidder who receives the highest combined score resulting from the technical and financial evaluations.

**The weight of the technical and financial components is 60% and 40% respectively, subject to contractual acceptability**

## Attachment 3

### “Procedure for Submission of Electronic Offers in 2 Sealed Files”

The Commission invites you to submit your sealed offer (Bid, or Proposal) in response to the solicitation forming part of this request.

**Please be sure to follow the instructions below very carefully, so that the documents you submit are encrypted, and cannot be opened without an encryption key (password). If the documents are not encrypted, they will not be accepted as part of this tender process.**

#### **CRITICAL INFORMATION:**

Create separate zip files for the technical offer and the financial offer (labeling them clearly in the title) with different encryption keys. Instructions for how to do this are provided below.

**Step 1: You provide the encryption key (password) for the *Technical Offer only* (in accordance with the below instructions)!**

**Step 2: After the Commission has performed the evaluation of the Technical Offer, if your Technical Offer is considered to be acceptable, the Commission will request the encryption key (password) for the Financial Offer you have already submitted by the tender Deadline.**

Should you have any questions, please send an email to [procurement@ctbto.org](mailto:procurement@ctbto.org).

**We recommend that you leave yourself plenty of time to complete the below process (including getting any necessary assistance from the Commission), as late offer will not be accepted.**

#### **INSTRUCTIONS:**

1. In a **WINDOWS** environment, one way of meeting the requirements is as follows.

We recommend using the open-source, free software **7-zip**, but if you are comfortable with other tools, the result should be the same, as long as you can apply encryption to the archive.

In the below, we'll use 7-zip as an example.

(You can download the 7-zip code for Windows at: [7-zip.org](http://7-zip.org) )

2. In **LINUX** environment, you can use, for instance, “sha1sum” on the command line.

## Creating the archives for submission

Regardless of whether the offer is a single file, or a collection of files, the files are easier to manage if delivered as a single, compressed file. Compressing the archive is a common way to meet size limitations in email systems.

As an example of how to submit your offer in the required format: assuming you are supplier “SOFTCOMP” and have the following files related to the offer for “RFP 2020-0010/EDWALD”. (*You will need to replace these elements with the real information for your actual offer in line with the relevant Instructions for Preparation and Submission of Proposals/Bids.*) Assuming further that you have installed the 7-zip software on the Windows system you are using.

We will only go through the creation of the Technical Offer (Proposal/Bid) component; the Financial Offer (Proposal/Bid) component is similar.

Figure 1 An example set of files to be submitted

Select the four files and right-click; a Dialog box pops up, with one of the options being “**7-ZIP** >”. Hover your cursor over the “>” part and a few more options appear, select the “**Add to archive**” option.

Another dialog box pops up (see ‘Figure 2, *Creating an Archive*’, next page):

Using the standard Windows methods, select a suitable location for the archive (if you don’t change it, the archive gets created right where the selected files are), and give it a name in the form of: “SOFTCOMP-2020-0010-EDWALD-TECHNICAL-BID”, of course replacing all the elements with the true values for the offer in question: the actual company indicator, and the actual RFP/ITB identification string. Note that it is not possible to put a slash “/” in the filename, and therefore put a dash “-” instead. Leave the file extension “.zip” as is.

Leave all the other settings as is, except: **add a password to the encryption** (see figure 2 below). This is done by typing the same password (of your choosing) twice in the two text fields in the lower right hand corner.

***Make a note of this password. You must choose different passwords for the two zip archives, that is, the Technical and the Financial Proposal/Bid.***

Figure 2 Creating an Archive

Now, we seek the “SHA1 Hash”, and electronic fingerprint of the archive you have just created. The hash is a string calculated from your file(s) and can be used to guarantee that the file has not been modified since you created it. Any change to the file will result in a different hash value.

There are many ways of calculating this; two common options are described below.

If the appropriate functionality is available in your Windows environment: Select the compressed archive in the Windows file manager, (eg. SOFTCOMP-2020-0010-EDWALD-TECHNICAL-BID.zip) and right click. One of the options to select is “CRC SHA >”. Hovering over the “ >” brings a few more options to light, select the **SHA-1** option. A smaller dialog pops up: (see Figure 3, SHA1 below).

Clicking Ctrl-C grabs the contents of this box. You can close the box after copying the contents. (You can paste the contents into a mail message, for instance.)

Figure 3 SHA1

If this CRC SHA function is not available by 'right-click' on your Windows version, you can also do this from 'the command line', a slightly more complicated way. Open a CMD window (see sidebar below), move to the folder where your archive is, and execute the command:

`"certutil -hashfile SOFTCOMP-2020-0010-EDWALD-TECHNICAL-BID.zip sha1"`  
where you obviously replace the name of the file with your real file name. The output of this command is the SHA1 "hash". You can copy-and-paste the string for use in the email (below).

Sidebar: How to open a CMD window in Windows:

The way to open a Command window (or 'terminal') depends on the version of Windows you have. The different methods are very clearly described in the following article, but a quick internet search will find multiple descriptions.

<https://www.lifewire.com/how-to-open-command-prompt-2618089>

Finally,

1. Create a new email, Subject: example- "SOFTCOMP-2020-0010-EDWALD". Add the two compressed archives, that is, the Technical Offer and the Financial Offer archives as attachments. The text of the email should contain the SHA1 information for both archives. **SEND THIS TO:** [sealed\\_bids@ctbto.org](mailto:sealed_bids@ctbto.org) (note that there is an underscore "\_" between "sealed" and "bids"). (Should the email become larger than your mail system allows, you can try sending the two archives in separate emails. Take care to include the right SHA1 information with each file.)
2. Create a new email, Subject: example- "SOFTCOMP-2020-2010-EDWALD-Technical Offer" the contents of which must contain the Encryption Key for the Technical Offer (the password

you used when creating the Technical Offer). (Again, note the underscore between 'bid' and 'keys'.)

- (a) The Contractor warrants that:
  - (i) No person or selling agency has been employed or retained by it to solicit or secure the Contract upon an agreement or understanding for a commission, percentage, brokerage, contingent fee or retainer, except regular employees or bona fide and officially established commercial or selling agencies maintained by the Contractor for the purpose of securing business;
  - (ii) No official or servant or retired employee of the Commission who is not a regular employee of the Contractor, has been or shall be admitted by the Contractor to any direct or indirect benefit arising from the Contract or the award thereof.
- (b) In case of breach by the Contractor of the warranties referred to in previous clauses, the Commission shall have the right to deduct from the Contract Price, or otherwise recover from the Contractor, the full amount of any such commission, percentage, brokerage, contingent fee or retainer so paid.

**16. INTELLECTUAL PROPERTY AND OTHER PROPRIETARY RIGHTS**

- (a) Except to the extent the Contractor has granted a license to the Commission, the Commission, shall be entitled to all intellectual property, including but not limited to copyrights, patents and trademarks, with regard to products, documents or other materials which bear a direct relation to or are produced or collected under the Contract. The Contractor shall take all necessary steps, prepare and process all necessary documents and assist in securing such property rights and transferring them to the Commission and/or to the government where the Services or Goods are to be provided, in compliance with the requirements of the applicable law.
- (b) The Contractor declares that it does not know of any intellectual property rights of third parties, which might be infringed in the execution of the Contract. Should, contrary to the Contractor’s expectation, claims be raised against the Commission charging it with infringement of intellectual property rights, the Contractor shall hold harmless the Commission and shall indemnify it to the full extent of any damages or awards arising from such claims. This obligation of the Contractor shall continue to be in full force and effect up to the expiration of such intellectual property rights.
- (c) The Commission shall give the Contractor due notice in writing of any charges of infringement brought against the Commission and of the filing of any suit for

infringement of intellectual property rights of third parties due to the execution of the Contract, and, without prejudice to the immunity enjoyed by the Commission as an international organization from every form of legal process, including enforcement and execution, the Commission shall give the Contractor the opportunity to defend the Commission against the said suit at its discretion and shall not, without the Contractor’s consent in writing, make any admission or consent to any claim of any third party, which might be prejudicial to the Contractor’s position.

**17. DEFAULT BY THE CONTRACTOR**

- (a) In case the Contractor fails to fulfil its obligations and responsibilities under the Contract and provided the Contractor has not remedied such failure(s) within thirty (30) days of having been given written notification by the Commission of the nature of the failure(s), the Commission may, at its entire discretion and without prejudice to its right to withhold payment(s), hold the Contractor in default under the Contract.
- (b) When the Contractor is thus in default, the Commission may, by giving written notice to the Contractor, terminate the Contract as a whole or such part or parts thereof in respect of which the Contractor is in default. Upon such notice, the Commission shall have the right to seek completion, at the Contractor’s expense, of that part or those parts of the Contract with respect to which the Contractor is in default.
- (c) The Contractor shall, in this case, be solely responsible for any reasonable costs of completion of the Services and/or delivery of Goods, including such costs, which are incurred by the Commission over and above the originally agreed Contract Price.

**18. WITHHOLDING OF PAYMENT**

- (a) The Commission may withhold any payment to the Contractor or, on account of subsequently discovered evidence, nullify the whole or part of any payment approval theretofore given, to such an extent as may be necessary to protect the Commission from loss under the Contract on account of:
  - (i) The Contractor’s failure to carry out its obligations or to make adequate progress with the obligations, except for failure arising out of force majeure;
  - (ii) The Contractor’s failure to remedy unsatisfactory performance, when such failure has been drawn to his attention by the Commission;
  - (iii) The Contractor’s failure to submit on time the reports required.
- (b) The withholding by the Commission of any interim payment shall not affect the Contractor’s obligation to continue performance of his obligations under the Contract.
- (c) No interest shall accrue on payments eventually withheld by the Commission in application of the stipulations of this paragraph.

## 19. LIQUIDATED DAMAGES

Subject to Clause 20 below (force majeure), if the Contractor fails to deliver any or all of the Services and/or Goods within the latest time period(s) specified in the Contract, the Commission may, without prejudice to its other remedies under the Contract, deduct from the Contract Price as liquidated damages, a sum equivalent to 0.2 per cent of the portion of the Contract Price for the delayed Services and/or Goods for each working day of delay until actual performance, up to a maximum of sixty (60) working days. The recovery by the Commission of proven damages shall not be excluded.

## 20. FORCE MAJEURE

- (a) Force majeure as used herein shall mean acts of God, industrial disturbances, acts of the public enemy, civil disturbances, explosions and any other similar cause of equivalent force not caused by nor within the control of either party and which neither party is able to overcome.
- (b) As soon as possible after the occurrence of any cause constituting force majeure, the Contractor shall give notice and full particulars in writing to the Commission of such force majeure if the Contractor is thereby rendered unable, wholly or in part, to perform its obligations and meet its responsibilities under the Contract.
- (c) In this event, the following provisions shall apply:
  - (i) The obligations and responsibilities of the Contractor under the Contract shall be suspended to the extent of its inability to perform them and for as long as such inability continues;
  - (ii) The term of the Contract shall be extended for a period equal to the period of suspension taking, however, into account any special conditions which may cause the time for completion of the obligations to be different from the period of suspension;
  - (iii) If the Contractor is rendered permanently unable, wholly or in part, by reason of force majeure to perform its obligations and meet its responsibilities under the Contract, the Commission shall have the right to terminate the Contract on the same terms and conditions as are provided for in the Termination Clause of the Contract, except that the period of notice may be seven (7) days instead of thirty (30) days;
  - (iv) For the purpose of the preceding sub-clause, the Commission may consider the Contractor permanently unable to perform in case of any period of suspension in excess of ninety (90) days. Any such period of ninety (90) days or less shall be deemed temporary inability to perform.

## 21. INSOLVENCY AND BANKRUPTCY

Should the Contractor be insolvent, adjudged bankrupt, or should the Contractor make a general assignment for the benefit of its creditors, or should a receiver be appointed on account of the Contractor's insolvency, the Commission may, without prejudice to any other right or remedy it may have under the terms of the Contract, terminate the Contract

forthwith by giving the Contractor written notice of such termination.

## 22. INDEMNIFICATION

The Contractor shall indemnify, hold and save harmless and defend at its own expense the Commission, its officers, agents, servants and employees from and against all suits, claims, demands and liability of any nature or kind, including cost and expenses arising out of acts or omissions of the Contractor or its employees or subcontractors in the performance of the Contract. This requirement shall extend, inter alia, to claims or liabilities in the nature of workers' compensation and to claims or liabilities pertaining to intellectual property rights. The obligations under this clause do not lapse upon termination of the Contract.

## 23. AMICABLE SETTLEMENT

The parties shall use their best efforts to settle amicably through negotiation any dispute, controversy or claim arising out of, or relating to, the Contract or the breach, termination or invalidity thereof. If the parties cannot reach such amicable settlement through negotiations, the matter shall first be referred to conciliation, by a request by either party for conciliation procedures. The conciliation shall take place in accordance with the United Nations Commission on International Trade Law (UNCITRAL) Conciliation Rules then prevailing, or according to such other procedure as may be agreed between the parties, within a time period of ninety (90) days. There shall be one conciliator. The conciliation shall be in Vienna, Austria, and it shall be conducted in the English language.

## 24. ARBITRATION

- (a) In the event of a failure to reach an amicable settlement in accordance with Clause 23 above (Amicable Settlement), any dispute arising out of the interpretation or application of the terms of the Contract or any breach thereof shall be settled in accordance with the arbitration rules established by UNCITRAL as at present in force. The number of arbitrators shall be one. The arbitration shall be in Vienna, Austria, and it shall be conducted in the English language.
- (b) The arbitrator shall take into account the internationally recognized general principles of commercial transactions. The arbitrator shall have no authority to award punitive damages, nor to award interest in excess of five (5) per cent, and any such interest shall be simple interest only. The parties shall be bound by any arbitration award rendered as a result of such arbitration as the final adjudication of any such dispute.

## 25. PRIVILEGES AND IMMUNITIES

Nothing in or relating to the Contract shall be deemed a waiver, express or implied, of any of the privileges and immunities of the Commission and its employees.

**25(a). TAX EXEMPTION**

In principle, the Commission is exempt from all Taxes. Since the arrangement under which such exemption is respected varies from country-to-country, the Contractor shall collaborate with the Commission to achieve Tax exemption at source or to pursue reimbursement of Taxes paid by the Commission, as the case may be.

**26. TERMINATION**

The Commission may terminate the Contract in whole or in part, and at any time, upon thirty (30) days' notice of termination to the Contractor. In the event such termination is not caused by the Contractor's negligence or fault, the Commission shall be liable to the Contractor for payment in respect of Services already satisfactory accomplished or Goods delivered and accepted and in conformity with the terms of the Contract, for necessary terminal expenses of the Contractor, and for the cost of such urgent work as is essential and as the Contractor is asked by the Commission to complete. The Contractor shall keep expenses at a minimum and shall not undertake any forward commitment from the date of receipt of the Commission's notice of termination.

**27. GOODS**

In the event that the Contract requires the Contractor to supply Goods, Clauses 28-35 shall apply in addition to the above.

**28. WARRANTY**

- (a) The Contractor warrants that the Goods, including packaging, conform to the specifications for the Goods ordered under the Contract and are fit for the purpose for which such Goods are ordinarily used and for purposes expressly made known to the Contractor by the Commission, and are new and free from defects in design, workmanship and materials.
- (b) This warranty shall remain valid for twenty-four (24) months after the Goods or any part thereof have been delivered and accepted, whichever is later, unless the Contractor has granted a longer period. Should the Commission transfer the title of the Goods to a third party during the warranty period, the right to enjoy the warranty shall be transferable to the new title-holder.
- (c) If, during the warranty period mentioned in sub-clause (b) above, the Goods or any part thereof are found to be defective or not in conformity with the specifications under the Contract, the Contractor shall, upon notification, promptly and at its own expense correct all such defects and non-conformities. If these defects and non-conformities cannot be corrected, the Commission shall have the right, at the Contractor's expense, to either demand replacement of the defective item, or receive appropriate reimbursement, or have the defective item repaired or otherwise procured from a third party.

**29. INSPECTIONS AND TESTS**

- (a) The Commission shall have the right to inspect and/or to test the Goods to confirm their conformity to the technical specifications. The technical specifications shall specify what inspections and tests the Commission requires.
- (b) The inspections and tests may be conducted on the premises of the Contractor or its subcontractor(s), at a point of delivery designated by the Commission and/or at the Goods' final destination. The Contractor shall give all reasonable facilities and assistance-including drawings and production data-to the Commission at no charge to the Commission.
- (c) Should any inspected or tested Goods fail to conform to the technical specifications, the Commission reserves the right to reject them and the Contractor shall either replace the rejected Goods or make all alterations necessary to meet specification requirements free of cost to the Commission.
- (d) The Commission's right to inspect, test and, where necessary, reject the Goods after the Goods' arrival at the point of delivery designated by the Commission or at the Commission's offices, shall in no way be limited or waived by reason of the Goods' having previously been inspected, tested and passed by the Commission.
- (e) Nothing in this Section on Inspections and Tests shall in any way release the Contractor from any warranty or other obligations under the Contract.
- (f) All equipment/material supplied under the Contract may be subject to pre-shipment inspection by a third party to be specified by the Commission. The Contractor is not liable for cost of this inspection.

**30. PACKING**

- (b) Transport of the Goods to the port of discharge or such other point in the country of destination and/or forwarding to the consignee, if any, (door-to-door) specified in the Contract shall be arranged and paid for by the Contractor and the cost thereof shall be included in the Contract Price.

  - (iv) In addition to notifying the Commission pursuant to sub-clause (iii) above, on becoming aware of any allegation of harassment, sexual harassment or abuse of anyone, the Contractor shall take all reasonable and appropriate measures to address the matter, including engaging in good faith consultations with the Commission, while ensuring minimum impact and/or disruption of the Services.

- (a) The Contractor will immediately notify the Commission upon becoming aware of any Proscribed Practices or other prohibited practices or conduct or suspicion thereof, as per Clauses 37-41, by itself or its personnel during the procurement process or the performance of the Contract. The Contractor will take all appropriate measures to prohibit and prevent its personnel from engaging in Proscribed Practices or any other prohibited conduct, as well as to investigate allegations thereof, or to take corrective action when such a Proscribed Practice or any other prohibited conduct has occurred.
- (b) The Contractor further warrants that it is not the subject of any sanctions, or otherwise identified as ineligible by any government, supranational organization (e.g., European Union), another entity of the United Nations System or multilateral development finance institution. - (b) **Compliance:** The Contractor confirms that it has a data protection policy in place that meets applicable legal requirements and that it will apply such a policy to the Commission's data, without prejudice to the privileges and immunities of the Commission. The Contractor will implement technical and organisational measures to ensure appropriate protection of the Commission's data, in conformity with the abovementioned requirements and internationally recognised standards and best practices. In addition, the Contractor will:
- (i) at its sole expense and risk, return, delete, or destroy all the Commission's data, including data backups, upon written instruction of the Commission. ### 1 INTRODUCTION

The Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization (hereinafter referred to as “the Commission” or “the CTBTO”) operates the International Monitoring System (IMS), a global network of seismic, hydroacoustic, infrasound, and radionuclide stations that send time-series (waveforms) and energy spectra data to the International Data Centre (IDC) in Vienna, Austria. More information can be found under [www.ctbto.org](http://www.ctbto.org).

The data are automatically processed at the IDC shortly thereafter in real-time, and a series of automatic bulletins are generated. The final automatic bulletin is reviewed by human analysts, and the result of their work is published in the Reviewed Event Bulletin (REB) for the waveform data, and the Reviewed Radionuclide Report (RRR). All of these bulletins, as well as the raw data from stations, are available to the State Signatories of the Comprehensive Nuclear-Test-Ban Treaty (CTBT).

These Terms of Reference (ToR) reflect the technical requirements for the provision of software engineering services in support of upgrading and maintaining NET-VISA, an innovative automatic association software that generates automated bulletins. These services are intended to be utilized by the Commission to develop and maintain the NET-VISA tool suite. Therefore, the ToR outlines the scope of work and responsibilities of the Contractor in delivering the required services to ensure the continued effectiveness and functionality of the NET-VISA tool suite.

Since the initial research and development effort in 2012, and a period where NET-VISA became operational to fit the needs of the Commission, the following has been accomplished:

- An upgrade to the locator library *libloc* now allows its use in a multi-threaded environment and in particular NET-VISA.
- NET-VISA’s capabilities now include processing data coming from infrasound stations jointly with seismic and hydro-acoustic stations.
- NET-VISA is now capable of using current noise estimate priors to improve on its inference capabilities during period of high noise level background.
- A modification to the birth algorithm improved the formation of regional events.
- A new algorithm to estimate uncertainty in a more accurate way has been developed. This is highly relevant to OSI activities.
- Additional documentation describes the software in more detail.
- NET-VISA is now used operationally to complement the legacy associator software GA and its results are presented to the analysts for review.

#### 1.1 Overview of technologies used

NET-VISA integrates seamlessly with the upstream and downstream components of the IDC software through the Oracle database for data Input and Output and the IDC queuing and messaging system RabbitMQ for triggering processing in synchronization with the other IDC modules.

## ANNEX B

NET-VISA is written in the Python scripting language and C programming language and calls functions from the IDC C language libraries. The two main components of NET-VISA for the purpose of pipeline processing are the `idcnetvisa_learn` and `idcnetvisa_infer` scripts.

## 2 SCOPE OF WORK

This section breaks down the scope of work (Work) into separate tasks. The main objectives of the Work are to:

- Seek improvements in the location accuracy of the automatic events. In particular address the issues related to the location-defining characteristics of seismic phases, the potential use of depth phases, and the exploitation of relative time and time differences between phases at the same station.
- Extend NET-VISA's capability to extend the infrasound model to account for atmospheric propagation specifications.
- Seek improvements in NET-VISA inference by using additional parameters
- Seek improvements in confidence of event identification using the waveform data by seeking lower signal-to-noise detections at stations with no automatic detection, particularly for hydroacoustic stations.
- Modify the NET-VISA software to address issues discovered during testing in the IDC environment in 2022-2023 and provide maintenance and documentation for the NET-VISA system as it enters a phase where it is used in operations and potentially becomes the main associator.

### **Task 1. Add a waveform processing step in the pipeline for NET-VISA**

Since a number of further improvements in NET-VISA are relying on extracting additional features from the waveforms for the purpose of better event locations, eliminating coda events, and improving hydro events there will be a need to add an extra step in the NET-VISA pipeline to analyze the waveform data and store additional attributes for existing arrivals. This could be in a separate table such as `netvisa_features` similar to the existing `hydro_features` and `infra_features` table.

### **Task 2. Treatment of hydroacoustic blockage including 3D effects.**

Research is being carried out under a separate contract with “Applied Ocean Sciences” to PTS to include 3D effects in underwater acoustic propagation. These effects allow for the possibility of signals arriving from single events via multiple paths, due to acoustic diffraction, reflection and scattering. This requires a move away from traditional concepts of ‘hydroacoustic blockage’ being described to association algorithms in terms of range-azimuth pairs describing the maximum range from which sound can arrive as a function of horizontal angle. 3D effects make it possible that sound sources in a given azimuth may be unblocked at short ranges, blocked in the shadow of an island, and then unblocked due to diffracted paths

## ANNEX B

around the island. NET-VISA will need to allow for this by implementing results of the 3D research. Testing and verification will be required.

### **Task 3. New capabilities: Prior storage from file to postgresql**

Prior storage from file to postgresql is necessary for the new generation pipeline. No nfs mount file system will be provided.

### **Task 4. Location and confidence ellipse estimator development**

NET-VISA computes a location and confidence ellipse of a SHI event using its probability density function based on the Bayesian inference methodology. This way provides a more accurate location and confidence ellipse compared with conventional means. In reality, it was identified that the new location and confidence ellipse estimation algorithm showed a theoretically plausible result than that produced by GA. In this task, an alternative libloc equivalent locator and confidence ellipse estimator is created using the NET-VISA priors, which can run independently from the NET-VISA association computation. This is beneficial to analysts because the confidence ellipse becomes more accurate.

### **Task 5. Maintenance and documentation, further improvements**

NET-VISA is now very close to become operational and we foresee that there will be a need for increased maintenance tasks as well as documentation. In particular, we need to continue making improvements to the Coda model to reduce spurious events. Furthermore, identify events missed by NET-VISA and those that are picked up by Scanner and/or GA and see if improvements can be made to the NET-VISA birth moves and/or model to pick up these events.

## **3 METHODOLOGY, STANDARDS, AND TECHNOLOGY**

The Contractor shall deliver software through incremental releases according to the Agile software development methodology (SCRUM). In particular, the Contractor shall follow the “Release Early, Release Often” (RERO) software development philosophy which emphasizes the importance of early and frequent releases in creating a tight feedback loop between developers, testers and users. Each new delivery shall include a description of what changes were made relative to the previous release, along with a list of files that were modified by each change.

The Contractor shall continue to use programming languages and technologies outlined in section 1.1 and defined by the CTBTO project manager and technical lead.

The software delivered under this Contract shall follow the IDC Coding Standards (which includes recommended coding style, the required implementation of unit tests, and use of

## ANNEX B

open standards and open-source libraries where possible) and shall compile and run under the Linux operating system family (RHEL/CentOS 7.x + 9.x, or compatible).

The software that the Contractor shall be working on under this Contract is being maintained in the Git/Github version control system and all software releases shall be delivered via this version control system.

The Commission has a change management process in place that covers reporting and tracking software problems, as well as releasing new software progressively from a test to an operational environment. An Integrated Ticketing System based on the JIRA software is used to support this change management process. The Contractor personnel shall familiarize themselves with this process and follow it when releasing software upgrades. The Contractor shall update the respective documentation to reflect changes caused by any upgrade to the software. All documentation shall adhere to the IDC Documentation Standards. Both standards mentioned above will be made available to the Contractor upon request after signature of the Contract.

### 4 ORGANIZATION OF WORK

The Commission will initiate Work covering the scope described in Section 2 in the form of Work Orders (WO). These Work Orders will be the basis for initiating Work, the exact scope of Work, the deliverables, acceptance, invoicing and payment of any Services requested by the Commission and performed by the Contractor.

#### 4.1 Initiating Work

- (a) Since the IDC follows the SCRUM software development methodology, WOs generally follow SCRUM sprints and cover software development services to be performed within the span of approximately 4 weeks. A WO is therefore issued during a sprint planning meeting and the work items to be addressed in that work order (sprint) are recorded in the Commission's JIRA-based tracking system. Initiation of the sprint constitutes the issuance of the WO. In case a WO is issued outside the framework provided by the SCRUM methodology, the Commission will provide the description of the work to be performed in writing to the Contractor and the Contractor shall respond with an estimate of the number of person-days required to complete the Work and with a delivery date. After acceptance of the estimate and delivery date, the Commission will issue the WO to the Contractor.
- (b) Prior to issuing a WO, the Commission and the Contractor shall also agree on the place of work (on-site/off-site or a combination thereof).
- (c) Each WO shall be based on one (1) or more of the tasks described in section 2 above.
- (d) The Contractor shall perform work only after receipt of the WO.

#### 4.2 Completion and Acceptance

- (a) At the end of a particular Work under the WO, the Contractor shall submit to the Commission the deliverables within the period of performance stated in the respective WO. The deliverables may include:
  - Updated Software Design Documents;
  - Updated Software User Guide;

## ANNEX B

- Description of how to use the programming interfaces developed under this Contract;
  - Updated source code for software and common libraries, including documentation.
- (b) Typically, in accordance with the SCRUM methodology, the Contractor will present the work performed during the sprint, including demonstrations of the newly developed software, during the Sprint Review meeting.

### 4.3 Invoicing and Payment

The deliverables, after being evaluated and accepted as satisfactory by the Commission, will form the basis for invoicing and payment of a particular Work performed under a WO.

## 5 TERM OF CONTRACT AND OPTIONAL EXTENSION

The Commission shall have the right, but not the obligation, to call-off Work in the form of WO during the Call-off Period. The Call-off Period shall cover a period of 12 (twelve) months following the entry into force of the Contract or the call-off of up to 350 person-days by the Commission, whichever occurs first. The volume of Work up to 350 person-days is an upper limit, and the Commission reserves the right, at its sole discretion, to call-off fewer person-days or no person-days at all.

The Commission shall have the option to extend the Call-off Period twice under the same terms and conditions as specified in the Contract.

## 6 LOCATION OF PERFORMANCE

The Contractor's personnel are expected to work at their place of business. They may be required to travel to the Headquarters of the Commission in Vienna (Austria) up to 4 times per Call-off Period and this will be agreed prior to issuing of WOs.

## 7 REQUIREMENTS FOR THE CONTRACTOR'S PERSONNEL

The Contractor's personnel working on the project shall collectively possess the following qualifications:

1. An advanced university degree in computer science or natural sciences with a strong emphasis on machine learning methods and big data methods.
2. At least 5 years of experience within the last 10 years developing scientific software in UNIX/Linux environments.
3. Minimum of 5 years of experience, working in Agile development environments, specifically using the SCRUM framework.
4. Minimum 5 years of recent professional experience within the last 10 years using the Python programming language.
5. Minimum 5 years of recent professional experience within the last 10 years using the C programming language.
6. Minimum 5 years of experience during the last 10 years developing data access layers in Python that interface with the PostgreSQL and/or Oracle databases.

## ANNEX B

7. Knowledge of the CTBTO operational procedures and waveform processing software is an advantage.
8. Ability to communicate effectively in English, both in writing and verbally.

### **8 CONTRACTOR'S EXPERIENCE, RESOURCES AND PROJECT MANAGEMENT**

The Contractor shall have experience of 7 years or more managing software of a similar scope and complexity. Work experience with large governmental/international organizations and/or multinational corporations is an advantage.

The Contractor shall provide suitable resources (staff, equipment, software/hardware) to carry out the tasks outlined in paragraph 2 above. The Contractor shall provide any required software and/or hardware required to perform the Work at their premises at no cost to the Commission.

The Contractor shall propose suitable project management such as agile methodology and Scrum approach and quality assurance methodologies.

### **9 RESOURCES TO BE PROVIDED BY THE COMMISSION**

For designated Contractor's personnel, and to the extent necessary for the Contractor to fulfil the requirements of these Terms of Reference when carrying out Work on-site at the Commission's premises, the Commission will provide:

- (a) Infrastructure, including office space and standard office supplies, hardware and software.
- (b) Physical access to selected areas of the Vienna International Centre; however, strict conditions and limitations on access and use of any accessed code or documentation described above will apply as contained in the Contract. Access will be granted only upon request and approval by the relevant internal bodies.
- (c) Relevant documentation.
- (d) support to the Contractor in responding to information requests from the Contractor in order to allow the Contractor to carry out the Work.

When not working on-site, the Commission will provide the Contractor's personnel with remote access facilities to the relevant CTBTO systems to the extent required for the performance of the specific task(s).

All other resources, be it for onsite or offsite Work, shall be provided by the Contractor.
